10:30 AM to 12:00 PM  **FEMA Emergency Preparedness through Youth Leadership**  
*Room 101B*

Disasters impact all segments of society and emergency preparedness is a shared responsibility among everyone. It calls for the involvement of every person — youth, parents, and community members — to help keep the Nation safe from harm and create resilient communities. Youth who take ownership of emergency preparedness actions will build a sense of self-empowerment and will be better equipped to respond appropriately during an emergency event. Prepared youth of today will become the positive influencers, educators and leaders of the future.

While youth may face specific challenges, they also have the resiliency to overcome the impacts of a disaster. By preparing youth to quickly adapt to and recover from emergencies, we help build more resilient communities before, during, and after disaster.
Additionally, youth can bring fresh ideas and unique perspectives to preparedness planning efforts that are valuable to their families, friends, and communities.

This workshop will review:
- The importance and benefit of involving youth in emergency preparedness efforts;
- Strategies for encouraging youth to take action and help them understand the hazards and risks that can affect their community;
- How to link youth preparedness to established family and community programs, especially in communities where English may not be the first language spoken (or understood) among adults;
- How to identify opportunities to embed youth in preparedness planning, emergency exercises, and peer education activities;
- How youth leaders can establish partnerships with other community leaders that place a high priority on youth preparedness;
- How to access resources (both English and Spanish) for youth;
- Examples of youth who have taken action to increase their preparedness, and the results of these efforts.

Workshop participants will benefit from hearing from volunteer organizations and emergency preparedness experts from the government sector that have worked with youth to prepare for and respond to emergency situations. Participants will have the opportunity to network with other community leaders for youth who want to be directly involved in disaster preparedness efforts.

Please join us in working with our youth to lead our communities and become better prepared.

Leaders know that teams that consistently win over time have honed their skills in navigating conflict. Yet leaders and managers are often too busy fighting fires to think about the key practices we need to model and develop in our teams preemptively. We are so caught up in this, that we’re unprepared for tricky conflicts when they arise. To get in front of these challenges, and to support our employees in their own leadership development, we need to determine the key practices that we should develop in our teams and build margin to develop those practices before we need them.

- Navigate differences in work style, personality, and communication styles;

With a focus on practical, evidence-based practices proven to have the best chance of building trust across diverse teams, this workshop will leave participants with clear takeaways they can apply immediately to improve their team collaboration moving forward.

Although employees don't have the authority that supervisors do, they can make a big difference preventing and eliminating harassment in the workplace. 10:30 AM to 11:45 AM Dynamic Interviewing Techniques

Room 202D

First impressions do count, and so do the following 30 minutes during your job interview! Naturally, interviewers will form first impressions when they meet you, so you need to pay attention to how you present yourself from the very first moment you enter the interview. However, once the interview starts the emphasis is not just on what you bring to the table as far as experiences and skills. Interviewers will pay much attention to how you present the information. You must present your experiences in an organized and engaging manner. In this workshop, you will learn how to prepare for behavioral interviews, and will practice answering questions using the STAR method to ensure you cover relevant and impactful details and leave out the fluff.
